The following is an examiner's statement of reasons for allowance: The prior art does not disclose an ion beam apparatus having two ion beam units, one that forms a cross-section in a portion of a sample by irradiating the sample with an ion beam from above and approximately orthogonally to a sample held by its end by a holder member and a second that removes a fracture layer by irradiating the cross-section from the side of the sample held by the holder member, i.e. from a lower, slanting direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
